

Focus Group Discussion with Alumni of FMNS UI

On the 23rd of July 2016 The Faculty of Mathematics and Natural Sciences (FMNS) UI held an alumni gathering at Margo Hotel, Depok. In this event the FMNS UI conducted Focus Group Discussion (FGD) with the alumni in parallel for each department Mathematics, Physics, Chemistry, Biology, and Geography.

In this FGD, particularly for the Department of Physics (DPh), the stakeholders reached the same conclusion that DPh UI has endowed its graduates with sufficient knowledge and skills needed to compete and survive in their professional careers, not limited only to science-related professions but also in other fields (finance, business, etc). One concern, however, was that most of the successful alumni thrived in their job fields due to their own struggle with little help from the department. They thus suggested that the students should be equipped with the comprehensive information about the application of the knowledge and skills they learned in the college in various job fields. One possible way to enable it is by conducting more often events, where alumni and students meet and discuss.

3D (Three Decades) of Physics UI '87

On April 29th 2017 the physics alumni batch 1987 conducted their 30-year reunion. The event was hosted by the Department of Physics. In this occasion the alumni 1987 shared their job and scientific experiences to the current students. They also shared tips and opportunities of how to enter and survive the job market.
